

4. A Bite to Eat

Cavities

It's a holiday in Zoolandia and Tamara and her mother are taking a walk together.

After a lot of begging, Tamara finally gets what she wants...

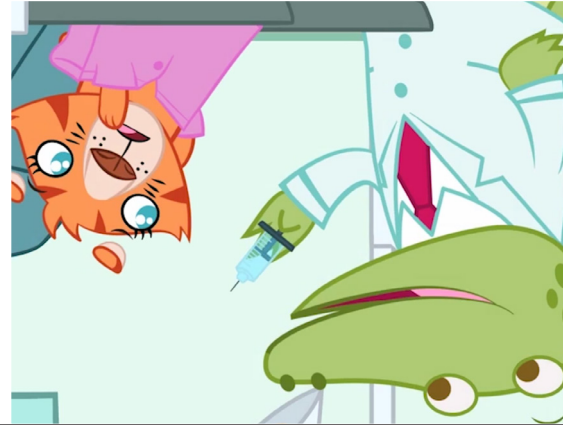

Pistachio ice cream!

Scan to learn
the process.

Cut through the black line 

He has to put Tamara's mouth to sleep with some anesthesia. The needle looks scary, but it doesn't hurt at all!

As soon as Tamara takes a bite of ice cream, her teeth start to hurt!

Her mom decides to take her to see Croco Doc.

After only a few seconds, Croco Doc sees that she has cavities. No wonder her teeth hurt so much!

Croco Doc tells Tamara that he's going to use some special tools to examine her teeth.

This will help him find out why her teeth hurt.

Scan to learn
the process.

Croco Doc removes the cavities
and puts fillings.

The fillings fill the holes where
the cavities used to be.

He gives Tamara some tips on
how to properly brush her teeth.

Hopefully she won't get any cavi-
ties again!

Croco Doc then explains that ca-
vities are caused by tiny bacteria.

These bacteria attack the tooth
enamel.

When Tamara gets home she
brushes her teeth for a very long
time.

She doesn't want to get any more
cavities!

He tells Tamara that she
shouldn't eat ice cream if she
doesn't want to get cavities.
He actually just wants the ice
cream all for himself!

A few days later, Tamara and her
mother run into Croco Doc and
Crat in town. Tamara is enjoying
some pistachio ice cream, when
suddenly, Crat takes it away from
her!
