Cut through the black line

Papa Horse is sick.

He can't stop coughing, has a fever, and his whole body aches.

Bruno's mom is away for work, so they decide to go to the doctor.

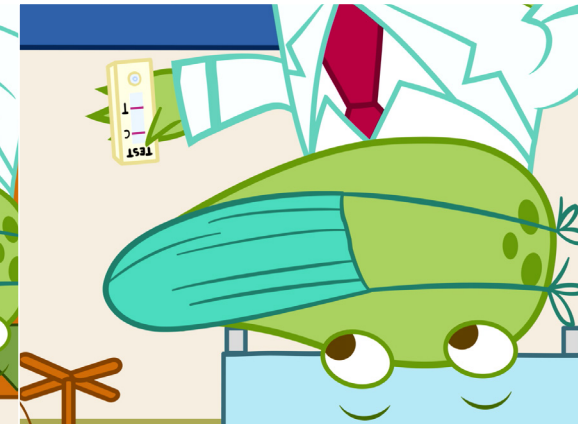

Covid is a virus, a type of microorganism so small that it can only be seen with certain special microscopes.

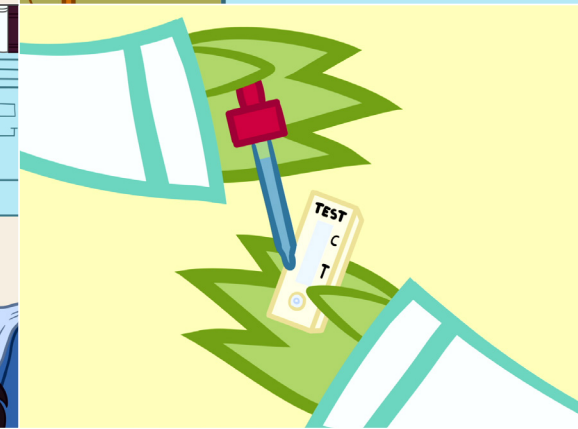

At the hospital, after putting on a mask, Croco Doc performs an antigen test on Papa Horse through the nose.

Perhaps it's Covid-19!

A few minutes later, it's crystal clear...

Bruno and his father have Covid-19!

He also does it to Bruno, just in case...

He could be infected but show no symptoms!

It spreads very easily, so we must be careful when coughing and cover our mouths with our elbows.

Additionally, we should wear masks to avoid infecting more people, wash our hands frequently, and stay at home.

Papa Horse's blood oxygen levels are normal.

Sometimes, Covid-19 can cause difficulty breathing.

Bruno thinks being confined due to Covid-19 isn't so bad...

He spends the day playing video games with his father!

Less playing and more cleaning!

However, when Mama Mare arrives home...
It's a complete mess.
