Dany will need to drink a lot of fluids to rehydrate, along with a syrup to reduce the fever.

9

Dany has a fever and is dehydrated. Everything points to him having gastroenteritis!

It's dawn at the Bull family's home, and Dany looks unwell again.

What could be happening to him?

Dany the little bull has been experiencing stomach pains for a few days. He doesn't feel well, and he frequently needs to go to the bathroom!

At the hospital, Crat can hear some noises in Dany's stomach...

They sound like dinosaur roars!

Gastroenteritis is an intestinal infection caused by a virus, so it's contagious!

The main symptoms of gastroenteritis include stomach pain, diarrhea, vomiting, and fever.

Since it's a contagious virus that enters through the mouth, thorough handwashing is essential—we sometimes touch our faces without realizing it!

At home, Dany becomes more cautious; he has learned that good hygiene is crucial!

Now, they are the ones with gas-troenteritis!

However, it's possible that his parents haven't been as careful...
